

Wisestaff, LLC is a Service Disabled Veteran Owned and Minority Owned Small Business headquartered in Houston, Texas with a satellite office in Northern VA. Wisestaff is able to provide a variety of health care supportive services and staffing to government and civilian health care organizations to include: facility development and management, provider sourcing, medical facilities interior design, clinical policy development, medical service line development and support, performance quality assessment, and clinical transition planning. Wisestaff specializes in providing rapid responses and effective solutions for complex health care problems.

One of our most recently completed projects includes supporting the US Army Health Facility Planning Agency (HFPA) with overseeing the construction and outfitting of all military medical facilities throughout the world by providing health care facility Interior Design services. From September 30, 2013 – March 29, 2015, we provided interior design planning coordination, support and technical advice to assist in the management of US Army Medical MILCON, MRR and SRM projects at locations as directed, which included the coordination and leadership in the development and execution of major capital investment projects in support of MEDCOM, Army, and DOD initiatives, priorities, criteria, and missions. The work essentially required the identification, development and monitoring of health facility projects from an Interior Designer perspective, from the determination of project requirements through the design construction processes.
